

ALEXANDER CRUZ MENENDEZ

CYBERSECURITY | VULNERABILITY ASSESSMENT | SECURITY OPERATIONS

Boston, MA 02116 | 339-241-1503 | acmalexamder05@gmail.com

EDUCATION

Fisher College - Boston, MA

B.S. Information & Technology: Cybersecurity | Expected Dec 2026 | GPA: 3.7

Current Coursework: Ethical Hacking; Systems Analysis & Design; Digital Forensics; Financial Accounting

Relevant Coursework: Information Security & Privacy; Secure Software Development; System & Network Fundamentals; Operating Systems; Database Design & Management; Cryptography; Programming I & II

CYBERSECURITY EXPERIENCE

Cybersecurity Compliance Intern

Dakdan Worldwide / USA Entertainment Ventures | Remote | Jun 2026 - Aug 2026

- Conducted vulnerability assessments of domains, IP addresses, and web applications using Nmap, OWASP ZAP, HTTP/HTTPS, and TLS inspection.
- Analyzed exposed ports, services, scan results, and web-security findings; documented risk observations and recommended remediation.
- Prepared client-facing web security, vulnerability assessment, and security guidance reports; collaborated with the cybersecurity team to improve findings.
- Supported Web Application Firewall (WAF) deployment and troubleshooting while working under project deadlines.

Internship Completion Certificate - Cybersecurity | Sports Media | Aug 2026

Co-Founder & Cybersecurity Lead

AEX Group Technologies | 2026 - Present

- Lead cybersecurity service planning, assessment methodology, technical documentation, and development of repeatable service-delivery processes.
- Coordinate across web development, digital forensics, incident response, marketing, and business development; contribute to proposals and client-acquisition strategy.

ADDITIONAL EXPERIENCE

Student Ambassador

Fisher College - Boston, MA | Oct 2024 - Present

- Lead campus tours and support admissions operations through scheduling, data entry, phone communication, document distribution, and event coordination.
- Communicate with prospective students and families, including international students, demonstrating public speaking, organization, and professionalism.

TECHNICAL SKILLS

Security: Vulnerability Assessment; Web Application Security; Security Monitoring; Log Analysis; Threat Analysis; Security Compliance; WAF Fundamentals

Tools: Nmap; OWASP ZAP; Burp Suite; Metasploit; Searchsploit; Kali Linux; curl; Netcat; OpenSSL

Networking: TCP/IP; Ports & Protocols; Service Enumeration; HTTP/HTTPS; TLS/SSL; Firewalls; VPN Fundamentals

Web Security: OWASP concepts; request manipulation; web fuzzing; authentication/session testing; SQL Injection; XSS; CSRF concepts

Systems & Code: Linux; Windows; Sysmon fundamentals; Python; Bash; C#; Java; HTML/CSS; SQL/MySQL

SELECTED CYBERSECURITY LABS & PROJECTS

- **SOC Level 1 - TryHackMe:** Investigated simulated alerts, logs, brute-force activity, phishing indicators, unauthorized access, and suspicious system behavior.
- **Web Application Security:** Used Burp Suite Repeater/Intruder to intercept and modify HTTP requests, fuzz inputs, configure payloads, and analyze session behavior.
- **Infrastructure Penetration Testing:** Performed Nmap enumeration, vulnerability research with Searchsploit/Metasploit, Linux enumeration, and controlled exploitation analysis.
- **Security Scripting:** Built Python scripts for port scanning and basic cybersecurity task automation.
